ABOUT

Mixed media paintings inspired by the sky, wondering where we come from and what we are part of.

Stars constellations, dimensions, universal symbols as an expression of a collective consciousness, united by connected lines.

Some of the titles are based on Rumi's poems about spirituality and the sky.

"Universe", 50" x 38"

PAULA VALENZUELA

Chilean abstract artist

My artwork explores the connection of darkness and light within us, the complexity of layers that we show to others and to ourselves.

"Painting for me is a way to be open to the moment, to be fully present in my body and mind"
